Data as of January 1, 2009.

"Total Number" represents the number of different students enrolled in the program. For graduate students, the total number is the same as the full-time equivalent (FTE) because nearly all coursework is in the department. For undergraduate students, the full-time equivalent enrollment of undergraduates in all education courses is about 230.

International students are part of the breakdowns by gender and by race and ethnicity.

Teacher Credential Program students (n = 28) omitted (see GSE&IS Alumni and Current Students table) because it is a post-baccalaureate, credential-only program (no degree is awarded by UCLA).
